- Current (7 months)

I do monitoring and supporting almost all the projects of the company. Beside that, I do training for the project managers of the company with knowledge, tools, techniques, etc, so that they can do project management better.

Beside that, I manage the software projects for customers in banking and real estate fields.

Some typical projects are:

- Customise and implement the Asset Management System for Hung Thinh Corporation, CT Group, Vietbank. The team size: 9 members. The technologies used: .Net Core, Angular, Ionic, MS SQL Server.
- Develop the Insurance Management System for Sacombank. The team size: 8 members. The technologies used [Redacted] MVC 4, Oracle DBMS.
- Develop the Stationery Management System for Sacombank. The team size: 7 members. The technologies used .Net Core, Angular, Oracle DBMS.

Project Manager

FSI Technology Development and Trading Investment

04/2022 - 06/2022 (3 months)

I manage the customers projects. The outstanding technology is OCR (Optical Character Recognition).

Project Management Consultant

Freelancer

06/2021 - 03/2022 (10 months)

I worked as an project management consultant for some companies. I did the project management training courses for employees (more than 25 members). Beside that, I studied about ERP (Enterprise Resource Planning) as my interests. I studied SAP and Odoo. I could do Odoo implementation and customization basically. I have basic experience with 10 modules in SAP S/4HANA (MM, PP, SD, FI, CO, WM, EAM, PS, HCM, QM) by reading the case study documents and exercising in the SAP S/4HANA learning system.

Project Manager

VietInfo Technology

10/2016 - 05/2021 (4 years 8 months)

Manage the software development and implementation projects for customers.

Manage the company products.

Some typical projects and products:

- The [REDACTED] product. The system supports users in managing, directing and collaborating tasks, using web browsers or mobile app. The product was implemented to more than 12 hospitals in Ho Chi Minh City. My role was product manager. I managed all the feature requirements of the product. I worked with the team to design, develop and deploy released builds to the production environment. The team size: 8 members. Technology: Flutter, DotNetNuke, WCF, MS SQL Server, .Net Framework 4.5.

- The project of implementation of the document management system for the People's Committee of District 11. The system supports cadres in document management, directing and working collaboratively on the application. My role was project manager. I identified the objectives, stakeholders, scope of the project. I developed the project plan, acquired the resources, collaborated with the third party (infrastructure provider), engaged the stakeholders, controlled the change requests, managed the project knowledge, led the team to the project goal. The team size: 6 members. Technology: Xamarin, DotNetNuke, WCF, MS SQL Server, .Net Framework 4.5.

- The project of development and implementation of the E-Government System for the Department of Transport of Ho Chi Minh City. The system provides online public services for people and businesses, and application to support the operation and administration of officials and employees. The team size: 9 members. Technology: Ionic, DotNetNuke, Angular, WCF, MS SQL Server, .Net Framework 4.5, SQL Server Data Tools (used to build Data Warehouse).

- The project of development and implementation of the satisfaction assessment system of people and businesses. It was implemented to the People's Committee of 24 districts and 19 Departments of Ho Chi Minh city. The team size: 6 member. Technology: [REDACTED] MVC, MS SQL Server, .Net Framework 4.5.
