# PHAM VAN KIEU

## DIGITAL TRANSFORMATION EXPERT IT DEPUTY MANAGER

- I have experience in digital transformation and IT department management overseeing projects such as ERP implementation, Transportation Management System (TMS), Warehouse Management System (WMS), and integrating technological solutions to optimize processes and various other projects.
- I am proficient in using Python, C#, [REDACTED] SQL, and Microsoft tools to leverage software programming and data processing applications for multiple enterprises.
- Additionally, I specialize in training Python programming, Excel VBA, etc., aiming to share experiences and promote digital transformation through employee training initiatives.

## EXPERIENCE

### IT Deputy Manager

04/2021-Today

### TBS Logistics

#### IT Department Management

- Managed an IT department with over 15 specialists.
- Conducted in-depth analysis of practical business requirements and development trends to formulate suitable strategies and systems.

#### Projects:

- **Warehouse Management:** Developed inventory tracking system, integrated barcode scanning to optimize operations, and conducted real-time analysis.
- **Mobile inventory management app:** Developed cross-platform Android and iOS app for warehouse management and administrative reporting.
- **Human Resource Management System (HRM):** Comprehensive HRM system including functions such as attendance tracking, payroll calculation, leave management, overtime management, access control, insurance, recruitment process, and generating salary slips.
- **Transportation Management System (TMS):** Led and managed TMS project for transportation and delivery, ensuring security of goods and partner information.
- **Asset Management:** Managed company assets, allocation, retrieval, procurement management, and asset conversion, providing asset reports.
- **Debt management:** Reporting on purchase and sales debts, managing payment deadlines, and monitoring outstanding balances for timely debt resolution.
- **OCR - Container and vehicle number recognition:** Utilized surveillance camera images to recognize container and vehicle numbers for gate access.
- **Process automation:** Implemented Excel automation with VBA and process automation with Power Automate.
- **Telegram Bot:** Used Python and C# combined with SQL Server to build a Telegram Bot allowing users to reset application passwords and ask questions related to system applications.
- **Management Reporting System:** Connected data from various systems automatically to provide real-time management reports.

#### Deputy Digital Transformation Manager:

- Proposed a strategy for applying technology to automate operational processes in manufacturing.

#### Training & Development of Human Resources:

- Provided training to employees on VBA, Python, Power BI, Excel, Google Sheets, and Power Automate.

Microsoft Platform

- Excel (Master)
- Power Apps
- Power Automate
- Power BI & Tableau
- Power Query
