

Lê Khoa

Developer

Short-term goals:

Leverage 3 years of programming experience to contribute to software projects, ensuring high quality and performance. Participate in advanced training courses to enhance technical expertise.

Long-term goals:

Aspire to become an expert in the company's core technologies, with the capability to design and implement advanced software solutions. Contribute to improving operational efficiency and developing more competitive products. Develop management and leadership skills to prepare for a team lead or technical manager role within the next 3-5 years.
