## SKILLS

### MAIN BACKGROUND SKILL

- Proficiency in modern ES6 JavaScript/TypeScript with React Native Expo/ CLI, hooks, and state management using Redux Toolkit, Redux Saga, Redux Persist
- Android is Junior level using Java, Kotlin
- iOS is Fresher level using Objective C, Swift
- Have experience updates directly to their users' devices using Codepush, Expo OTA
- Have knowledge of RESTful API, Apollo + GraphQL client,
- Know Push Notification and handle deeplink to app
- Familiarity with design and coding principles such as Clean code, SOLID, and using OOP, MVVM, MVP design pattern
- Know about integrating other services such as Google Maps, Sentry, Firebase (FCM, Event, Crashlytic, Remote Config, Dynamic Link)
- Troubleshoot and debug using tools such as Postman, Reactotron, Burp Suite, Proxyman
- Familiarity with native build tools like Xcode, and Android Studio, configuring multiple flavors/ schema
- Have experience of using workflow management tools such as Asana, Trello, Jira, Slack
- Proficiency in managing version, testing, and uploading to App Center, Firebase Distribution, Google Play, and AppStore.

# PHẠM VĂN LINH

## MOBILE DEVELOPER

### OBJECTIVE

I have more than 3 years of experience working on mobile development (3+ YoE React Native, 1.5+ YoE Android) and more than 1 YoE in the team leader position. I look forward to working in a professional programming environment where I can develop my professional skills, learn new programming knowledge to complete my assigned work, and improve my English.

### WORK EXPERIENCE

- 01/2024

#### FPT Information System

- Participate in developing and maintaining 3 digital citizen projects for Ho Chi Minh City, Khanh Hoa Province, Dong Thap Province
- Create an advanced lookup component and reuse it for 10 features for the Khanh Hoa digital citizen application
- Support mobile team to fix bugs and shorten the time up to 3 times
- Support web team to fix minor bug
- Communicate with PO, BA, UI/UX Designer, and Tech lead developers to clarify requirements and propose solutions
- Manage version, testing, and upload using

MOBILE TEAM LEADER (06/2022 - 11/2023) // 05/2022 - 11/2023

#### ALTEK Technology Company

- Build and maintain telecommunications and e-wallet applications with more than 1 million downloads for Viettel's investment markets (Metfone, Lumitel, Telemor, Natcom)
- Exchanging expertise and consulting on technology solutions in the mobile field for customers
- Learn new technologies and techniques to optimize application performance
- Manage mobile team (10 people) and report weekly progress to superiors
- Receive tasks and evaluate them, then assign them to team members
- Work with other teams (BE, BA, QC) with Agile/Scrum
- Create templates for company projects (React Native, Android Library module)
- Fix Google reject app error at risk of app deletion (Intent redirection) and other Google reject app errors (Form safety, API level 33)
- Manage version, testing, and upload to App Center, Firebase Distribution, Google Play, and AppStore

#### Achievements:

- Achieved the title of Rising Star Employee (01/2023)
- Hit KPIs A and B for many consecutive months

REACT NATIVE DEVELOPER // 01/2021 - 04/2022

#### HDWEBSOFT Software Development Company

- Turn UI designs and product specifications into intuitive UI
- Clean code and optimize performance
- Research and apply new techs to projects
- Participate in code templates for the company
- Participate in technical exchanges with customers
- Integrated company's SDK
- Working with Agile/Scrum development process

- Highly passionate about technology and software development.
- Proactive and effective self-management and research skills.

## SELF-STUDY KNOWLEDGE

ReactJs, \_\_\_\_\_, Appium

## INTERESTS

I like coding, music, boxing, ...

- Publish app to store

### Achievements and skills gained:

- Be assessed positively by the manager: active, extremely adaptable...
- Observe, learn, and catch projects well

## EDUCATION

 **MAJOR: INFORMATION TECHNOLOGY** // **SEP 2016 - SEP 2020**

**NONG LAM UNIVERSITY**

## PROJECTS

 **DIGITAL CITIZEN** // **12/2023 - 01/2024**

**Customer** Khánh Hoà, Đồng Tháp, Trà Vinh, Bình Định, Ninh Thuận

Team size 15

**My position** React Native

- Create an advanced lookup component and reuse it for 10 features for the Khanh Hoa digital citizen application
- View location on Map via cluster area and custom display on Map
- Config i18n to use multi-language
- Support another member and maintain the application by fixing existing issues

### Technology used

Typescript, Redux (Saga, Toolkit, Persist), \_\_\_\_\_ Firebase (FCM, Event, Crashlytic)

 **CAMID** // **05/2022 - 11/2023**

**Customer** Metfone - Viettel Cambodia

Team size 20

**My position** Android

- Config and handle deep-link into app for features (App links and Dynamic link)
- Config push notification
- Loyalty feature
- Handle logic buy the package's service on the home screen
- Communication between the game webview and the app to process play purchases
- Caching data with RxJava to improve UI/UX
- Fix crash on Firebase Crashlytics
- Fix Google reject app (Intent redirection, Form safety, API level 33)
- Optimize and improve the efficiency of existing apps
- Publish app to Store

### Technology used

Java, Kotlin, Retrofit, RxJava, Firebase (FCM, Event, Crashlytic, Remote Config, Dynamic Link)

 **CAMID NETWORK TEST LIBRARY** // **06/2023 - 08/2023**

**Customer** Metfone - Viettel Cambodia

Team size 5

**My position** Android

- Measure download/ upload/ ping speed
- Collect cell info (rsrp, rsrq, mcc, mcn, enb, ...)
- Detect location and mobile carrier information

- Create a dynamic survey form and submit the measure result
- Build the design to UI code
- Integrate with API to transmit data to the server for reporting
- Export to library

#### Technology used

Java, Retrofit, Telephony

### **EMONEY** // 07/2022 - 11/2023

**Customer** Metfone - Viettel Cambodia

Team size 20

**My position** Android, iOS

- Config dynamic link into app with a custom domain
- Config APNs Certificates/ APNs Authentication Key for iOS
- Security connect server side with config SSL on client app (use .crt file)
- Execute minor tasks for the iOS app same Android
- Fix crash on Firebase Crashlytics
- Integrate event log to serve report
- Fix Google reject app (Form safety, API level 33)
- Optimize and improve the efficiency of existing apps

#### Technology used

MVP, MVVM, Kotlin, RxJava, Coroutines, LiveData, Data binding, Firebase (FCM, Event, Crashlytics, Remote Config, Dynamic Link, Hosting), Swift

### **LUMIPAY** // 05/2022 - 11/2023

**Customer** Lumitel - Viettel Burundi

Team size 10

**My position** React Native

- Integrate native module eKYC
- Integrate ESB for W2B, B2W
- Config push notification
- Handle refresh token and authentication with biometric
- Caching data with Redux persist
- Build the Figma design to UI code
- Fix Google reject app (Invalid Data safety form, API level 33)
- Publish app to the store (Google Play, App Store)

#### Technology used

TypeScript, Redux (Saga, Persist), Google Maps, Firebase (Remote Config, Dynamic Link), CodePush

### **MOSAN** // 11/2022 - 11/2023

**Customer** Telemor - Viettel Timor

Team size 10

**My position** React Native

- Configuring multiple flavors/ schema for 4 env (Prod, UAT, Stage, Dev)
- Generate QR code and download it to share the payment method
- Config push notification for app Agent, EU
- Handle expired session
- Move and sort categories
- Pick a location on the map to register new agent
- Optimize and improve the efficiency of existing apps

#### Technology used

Type script, Redux (Saga, Persist), Google Maps, Firebase (Remote Conflg, Dynamic Link), CodePush

## **NATCASH** // 05/2022 - 11/2023

**Customer** Natcom - Viettel Haiti

Team size 6

**My position** React Native

- Integrate eKYC via API
- Animation move the support icon on the screen
- Cluster markers Google maps
- Buy Lottery on Webview and purchases on the app
- Push notification
- Build the Figma design to UI code for new features
- Publish app to the store

### **Technology used**

Type script, Redux (Saga, Persist), Google Maps, Firebase (Remote Conflg, Dynamic Link), CodePush

## **TROVE** // 06/2021 - 11/2021

**Customer** Goldfish

Team size 10

**My position** React Native (work and report directly to PL)

- Clean code and fix bug
- Implement UI components and libraries
- CRUD kernels and collections use react-native-richtext-editor
- Handle follow, unfollow contributors
- Build the Figma design to UI code

### **Technology used**

React Native CLI, Axios, Firebase, Spotify, Google Maps

## **POOLPRO** // 01/2021 - 09/2021

**Customer** Goldfish

Team size 10

**My position** React Native (work and report directly to PL)

- Clean code and fix bug
- Show job with location on Map
- Push notification, review company via Arrivals before rating official on Google
- Handle logic check-in, checkout, calculate the bill
- Persist data to check-in and checkout for offline feature
- Publish app to the store

### **Technology used**

Expo, GraphQL (Persist), AWS S3, Plaid, Circle CI + Expo turtle
