

10-2014 - 11-2023

# Senior full-stack software developer TS24 CORP

I have over 10 years of experience working at T24 where I have been extensively involved in full-stack development across various projects. Below is a summary of my work experience:

10-2014 - 02-2016

# C# junior full-stack software developer SALE MANAGEMENT

From 2014 to 2016, I focused on C# application development, with a speci- c emphasis on the - eld of point-of-sale software. During this time frame, I had the opportunity to participate in signi- cant projects and achieved notable milestones:

- Integrated Point of Sale )POS) Application: developed an integrated point-of-sale software application that seamlessly interacted with POS systems and inventory management, enhancing inventory control and sales transactions.
- Payment Gateway Integration: I integrated electronic payment methods, digital wallets, and online payment gateways into the application, providing a convenient payment experience for customers.

Security and User Management: I ensured customer data security and implemented user management with authentication and authorization capabilities.

- Custom User Interfaces: I created customized user interfaces to meet the speci- c needs of individual clients, providing exibility in the application's usage.
- **Performance Optimization**: I optimized the application's performance to ensure quick response times, which are crucial in a sales environment.
- **Testing and Bug Fixing:** I conducted rigorous testing and bug-- xing to maintain the stability of the application under various circumstances.

With my experience in C# application development for point-of-sale software during this period, I built a foundation for understanding the unique requirements and challenges in this - eld, ensuring that the application met the speci- c business needs of various enterprises.

02-2016 - 11-2023

### **©** OBJECTIVE

My career objective is to become a Senior Full-Stack Software Developer at a leading organization in the - eld of information technology. With over 10 years of experience in software development and expertise in C#, Python,.. I am commi-ed to contributing to the organization's success by driving product development and improving operational e-iciency. I possess a strong knowledge of MVC, SQL, PostreSQL, MongoDB, Odoo,..., and the ability to work e- ectively in a creative and problem-solving environment. I stay updated with the latest technological trends and am eager to learn, ensuring that the organization's products remain at the forefront of technology. I aspire to be part of an exceptional team, contributing to the development of advanced software applications and addressing diverse software development challenges.

areas and business processes related to Customs. During this time, I have been involved in several signi- cant projects and have achieved notable milestones:

- Customs Procedure Handling System: I developed an application system to support customs procedures, including the import and export of goods, management of customs documents, and veri- cation of relevant documentation.
- Integration with Customs Authorities: I integrated the application with customs authorities to ensure compliance with customs regulations and legal requirements during the import and export processes.
- Customs Data Management: I developed data management tools to track customs information, ensuring accuracy and e- iciency in document and data management.
- Security and Information Protection: I focused on ensuring the security of customs-related information and implemented security layers to safeguard critical data.
- Testing and Veri) cation: I conducted thorough testing and veri- cation to ensure the stability and reliability of the application in the Customs-required environment. With experience in C# application development related to Customs from 2016 to the present, I have built a reliable knowledge foundation in this eld and ensured that the application complies with legal regulations and speci- c requirements of Customs-related organizations.

### 01-2019 - 11-2023

## PYTHON SEnior full-stack software developer MODULES OF ODOO15

From 2019 to the present, I have primarily focused on Python programming within Odoo 15 and have developed modules for various applications, including school bus management, condominium management, sales management, and human resources management. During this period, I have been involved in multiple signi- cant projects and have achieved the following milestones:

- School Bus Management Module: I developed a module for school bus management within Odoo 15, enabling e- icient tracking of school bus routes, student a- endance, and scheduling to ensure safe and reliable transportation for students.
- Condominium Management Module: I created a module for condominium management in Odoo 15, which allows for streamlined management of condominium facilities, resident communication, maintenance requests, and billing.
- Sales Management Module: I designed a module for sales management in Odoo 15, providing tools for order processing, inventory management, and sales reporting to enhance the sales process's e- iciency and e- ectiveness.

TS24 Corp Software Manager • Human Resources Management Module: I developed a human resources management module within Odoo 15, facilitating employee records management, leave requests, a- endance tracking, and payroll processing. My experience in Python programming on Odoo 15 from 2019 to the present has equipped me with in-depth knowledge of Odoo's capabilities and the ability to create tailored solutions for various business needs.

### EDUCATION

09-2008 - 04-2012

### HOA SEN UNIVERSITY

#### **BACHELOR OF INFORMATION TECHNOLOGY**

Degree classi- cation: Good

09-2008 - 04-2012

### **VUS SCHOOL**

### **UPPER INTERMEDIATE**

· Degree classi- cation: Very good

### **CERTIFICATIONS**

TOEIC-830
BACHELOR OF INFORMATION TECHNOLOGY-Good

### **SKILLS**

- Programming Languages: Python, C++, C#, HTML, XML.
- Technologies and Frameworks: List the technologies and frameworks you have used, such as React, Angular, Spring, Django, and many others.
- **Software Development Processes:** Pro-ciency in MVC, Entity Framework, Odoo framework ...
- Version Control and Version Control Systems: Experience with using Git & SVN for source code version control.
- Database Knowledge: Knowledge of database management, pro- ciency in SQL, and familiarity with common database management systems like MySQL, PostgreSQL, MongoDB.
- Security Awareness: Understanding of security vulnerabilities and information security practices in software development.
- Cloud Computing Knowledge: Familiarity with cloud services such as Google Cloud.
- Teamwork Skills: The ability to work e- ectively in a team environment and communicate well with other project members.

- Problem-Solving Skills: The ability to identify issues and
- nd e- ective solutions in software development.
- Planning and Project Management Skills: If you have experience in project management and resource and time management.
