Hello! I am a web developer with skills in both frontend (FE) and backend (BE) development. I am passionate about building visually appealing and functional web applications.

Throughout my development journey, I have worked with various technologies and programming languages. On the frontend side, I have experience with Javascript, Typescript, and popular frameworks such as ReactJS, Angular, and VueJS. I always strive to learn and apply the latest technologies to deliver the best user experience.

On the backend, I have expertise in using Python and the Django framework, along with Django Restframework, to build powerful and easily maintainable APIs. I am also familiar with SocketIO for real-time communication.

I enjoy taking on new challenges and collaborating with teams to create innovative and efficient web solutions. With my skill set and experience, I am confident in delivering high-quality projects that meet client requirements. Let's connect and discuss how I can contribute to your web development needs!
